Profile

MCA student with hands-on experience in ASP.NET Core, Angular, SQL Server, and RESTful API development through internship and academic projects. Skilled in building secure web applications with authentication, authorization, and database management. Passionate about software development, problem-solving, and learning modern technologies to create scalable and efficient solutions.

Education

Dharmsinh Desai University	Aug 2025 – Present
MCA (CGPA: 8.61)	Nadiad, India
Dharmsinh Desai University	Jul 2022 – May 2025
BCA (CGPA: 8.2)	Nadiad, India

Technical Skills

- Languages:** .NET, Core Java, HTML, SQL, JavaScript, Python
- Frameworks:** Angular, .NET MVC, ASP.NET Core
- Tools:** Microsoft Azure, Swagger, VS Code, Git, GitHub

Professional Experience

Sufalam Solution Private Limited	Dec 2024 – Mar 2025
Intern	
- Developed RESTful APIs with ASP.NET Core 8 and implemented frontend functionality using Angular 19. - Implemented authentication, authorization, session management, and role-based access control for secure access. - Integrated email workflows, OTP verification, and report delivery functionality to streamline user interactions and improve system reliability. - Tested and validated APIs utilizing Postman and Swagger to ensure reliability. Optimized SQL Server database structures, stored procedures, and relational mappings to enhance data retrieval speed.	

Projects

Laboratory Information Management System (LIMS)	Mar 2025
- Architected and developed a full-stack LIMS to automate laboratory workflows, patient management, and diagnostic reporting. - Implemented secure authentication and authorization using JWT-based tokens with role-based access control (RBAC) and session management. - Developed end-to-end modules for patient registration, sample tracking, test result entry, report approval workflows, and real-time dashboard analytics. - Designed RESTful APIs following Controller-Manager-Repository pattern and optimized SQL Server database schemas for data integrity and performance. - Integrated automated email-based report delivery and granular user access management for enhanced operational efficiency
